

The Evolution of Log Printing is Here!

Neuralog has been developing purpose built well log printing solutions for the O&G industry for 10 years. Our printers are designed to operate seamlessly and require no add-on software for automatically sensing top of form printing. The NeuraLaserColor II will change your expectations of well log printing.

What's New?

- Record setting speeds - 11 inches per second
- Precision printing - On-the-fly length calibration
- Increased efficiency - 20,000 page yield toner
- Operational versatility - Native PDF support
